OBJECTIVE

Aspiring IT professional with a strong foundation in Artificial Intelligence Machine Learning, SQL, and Data Science. Passionate about Python programming and leveraging technology to build smart and efficient solutions. Seeking an entry-level position in software development to apply my skills in Python, AI/ML and Data Science technologies to contribute to innovative projects and continuous learning.

EDUCATION

Bachelor of Technology (B. Tech) in Information Technology: 2025 – Present

JG University, Ahmedabad

Relevant Coursework: Artificial Intelligence, Python Programming, Data Structures, Machine Learning, Database Management Systems, Web Development

Diploma in Information Technology: 2025

Government Polytechnic for Girls, Ahmedabad

Relevant Coursework: Python Programming, Data Structures, DBMS, Operating Systems, Advanced Java.

CGPA: 8.99/10.0

Secondary School Certificate (SSC): 2022

Diwan Ballubhai Madhyamik Shala, Ahmedabad

Percentage: 74%

Grade: B1

PROJECT

Diamond Price Prediction: (Technology: - Machine Learning & Data Science)

The "Diamonds Price Prediction" project leverages the power of machine learning to accurately forecast the prices of diamonds. With the diamond market being highly dynamic and influenced by various factors, this project aims to provide reliable predictions to assist buyers, sellers, and investors in making informed decisions.

Sentiment Analysis on Movie Reviews: (Technology: - Machine Learning & NLP)

Built an NLP-based sentiment classification model using the IMDB movie reviews dataset. Performed text preprocessing, vectorization, and trained a Multinomial Naive Bayes classifier achieving ~85% accuracy. Deployed the trained model using a Streamlit web app for real-time sentiment prediction.

INTERNSHIPS

SmartED Innovation

Bengaluru | June 2025 – August 2025

- Working on real-world AI solutions and smart education systems.
- Collaborating with mentors from Microsoft and NSDL to build AI-driven tools.
- Gaining experience in AI model design, deployment, and integration with education platforms.

360 Design | (6 Weeks)

Ahmedabad, Gujarat | June 2024 – August 2024

- Assisted in software development projects, focusing on UI programming and backend logic.
- Gained hands-on experience in AI applications and data analysis.

Axisray | (2 Weeks)

Ahmedabad, Gujarat | August 2023 – August 2023

- Developed Python-based scripts to automate tasks and optimize workflows.
- Worked on improving system performance using Python and data structures.

TECHNICAL SKILLS

Programming Languages	Python, Java, SQL
Web Technologies	HTML, CSS, JavaScript
Frameworks/Libraries	Streamlit, pandas, scikit-learn and more
Tools & IDEs	IDLE, PyCharm, Visual Studio Code, Notepad++
Core Concepts	Data Structures in Python, OOP, File Handling
Soft Skills	Communication, Teamwork, Problem-Solving, Critical Thinking
